

WAYNE ART CENTER PRESENTS

SUMMER ART CAMP 2017

12 WEEKS : JUNE 5 - AUGUST 25

Our 34th Camp Year!

Summer Art Camp:

Summer Art Camp offers over 200 classes over 12 sessions in a creative, supportive atmosphere that combines exploration and learning with serious fun! Taught by experienced art educators and professional artists, *Summer Art Camp* offers unique opportunities for youth, ages 3-16 of all skill levels in all mediums. Our goal is to balance skill development and problem solving, while fostering creativity, confidence, and self-expression.

Join the Wayne Art Center this summer as we search for *Lost Worlds* using awe-inspiring stories from the past to create art, learn about art history, unearth secrets from our ancient ancestors and, in the process, learn a little more about ourselves. Become an art explorer as we travel through lost worlds and past civilizations to discover how peoples from long ago have impacted the present. We will uncover rare and amazing artifacts, diverse and colorful cultures, master artists, and creative inventors throughout the ages. Explore the Jurassic period full of brave burning lava flows, sketch a T-Rex hunting for food, make wall paintings as the cave man did in dark caves at the dawn of time, or dive into the deep sea to catch a glimpse of a giant squid or capture the Loch Ness monster. Ride on armored horses with the Knights of the Round Table, learn to illuminate medieval manuscripts, and journey to distant lands and galaxies throughout the millennium.

JOIN US this summer in exploring our world as we travel through ART!

Explore dinosaur fossils and create foot prints from clay. Learn how to construct robotic dinosaurs and set them free to roam the halls of the Wayne Art Center. This week, we create works of art that are inspired by dynamic landscapes, giant lizards, ancient birds, and sea creatures from the earliest periods of earth's long history.

Week 4: *Futuristic Worlds*

Robots, spaceships, distant planets.... What will the world look like in 10, 20.....100 years? This week, campers will become art astronomers and stretch their imaginations to create art that reflects the future. How will futuristic cities be constructed? What will our robotic counterparts really look like? What kinds of creatures will still exist and what new ones will evolve? Jump into WAC's Time Machine and join us as we explore the future and what may lay lightyears beyond our universe!
